## About Jordan

My name is Jordan, and I like to design things. I make things for the web look really, really good, and work even better. I've also been known to dabble in photography, videography, and graphic design.

## Work Experience

### Web Specialist, Vantiv

*Spring 2014 - Present*

At Vantiv, I oversee, maintain and create all web properties enterprise wide. I am in charge of the creation and tracking of Landing Pages, as well as editing and managing content on Vantiv.com. Vantiv is one of the most trusted and respected organizations in the payment processing industry, as well as the nation's largest PIN debit acquirer.

### Junior Designer, Thrive Internet Marketing

*Spring 2012 - Spring 2014*

At Thrive, I was part of a small, award-winning digital marketing team. As Junior Designer, I was responsible for walking clients through the lifecycle of their website, from initial meetings and conception, all the way through design, development, and deployment.

## Education

### Bowling Green State University

*Bachelor of Science, Technology - Visual Communication Technology*

*Fall 2009 - Winter 2013*

The Visual Communication Technology program at BGSU has a very well-rounded course load with high expectations of their students. Mandatory classes include study in web design, graphic design, photography and videography. Classes in Entrepreneurship, Psychology and Writing are also highly encouraged. In order to graduate from the program, students must complete at least three co-op internship experiences, which I completed with the University as a Web Admin, as well as with Thrive Internet Marketing.

At BGSU, I became president of Visual Communication Technology Organization, and oversaw a recruiting effort that saw our numbers rise by over 400%. I was also named Technology Chair and Marketing Coordinator for Alpha Sigma Phi fraternity.

## Tools

HTML5	Jekyll
CSS3	Bourbon/Neat
Sass	ZURB Foundation
Gulp	Bootstrap
Git	WordPress

## Software

Photoshop	AfterEffects
Illustrator	Premier Pro
